

LOCUS SEAT

The Iconic Standing Desk Seat

LOCUS SEAT

The Iconic Standing Desk Seat

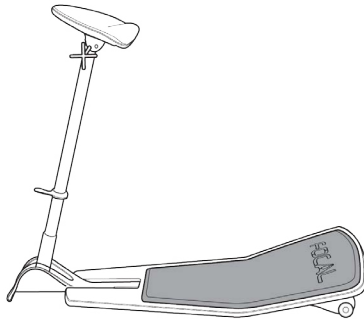

The Locus Seat is a rebel with a cause. It rejects both the design of the traditional chair and the notion that you have to be sitting down to get serious about your work. Why? Because you deserve to feel good great at work, and your current office chair is letting you down.

This award-winning ergonomic seat is radically responsive; it's designed to adjust to every move you make. As you work your body becomes effortlessly active. Your spine relaxes. Your major muscles engage. Your circulation increases. You get the

comfort of sitting with the activity of standing. Pretty good combo, if we do say so ourselves. Already a standing desk user? Good news. The Locus Seat pairs perfectly with any standing desk or height-adjustable workstation, so you can easily upgrade your existing standing desk set-up.

The Locus Seat comes with Focal's Anti-Fatigue Mat. Designed to add an extra layer of comfort to your Locus Seat, the Anti-Fatigue Mat takes stress off your feet and ankles so you can work comfortably for longer stretches of time.
